Water Conservation and Management-Policy

- Maximize water usage efficiency and minimize wastage of water.
- All existing buildings to be used for water conservation and rain water harvesting.
- Promote investment in and maintenance of efficient water infrastructure and green infrastructure in all future development plans.
- Promote appropriate innovative water and wastewater management technologies and services.
- Provide training on the water conservation measures adopted by the college to all the students, staff and other stakeholders of the college and nearby community.
- Ensure awareness about the water conservation policy of the college among all the stakeholders.
- Establish waste water treatment and recycling centres.
- Create awareness about the cost-effectiveness of water conservation projects among students and local community.
- Improve water quality. For example, create awareness about garbage disposals among public and take the leadership
- Recycle non-sewage and greywater for on-site use (such as toilet flushing, landscape irrigation, and more generally, considering the water quality requirements).
- Build relationship between environmental, societal leaders and policy makers to identify obstacles and opportunities to increase the role of conservation and efficiency in making the water supply systems sustainable.
- Community programmes: Organise various outreach programmes under the leadership of NSS
- Increase understanding of water and its movement including groundwater and its interaction with surface water, and the effects of climate change on water resources among student and teaching community.
- Inform, educate and increase awareness regarding the importance of water to life, and the need for conservation and efficient use of water.
- Take pledge on Water Conservation as Catch the Rain
- Protect the streams, ponds and rivers and the public area surrounding the college.
